ERRATA #2

for the 1997 Revision of the

Land and Resource Management Plan and Environmental Impact Statement

Arapaho and Roosevelt National Forests and Pawnee National Grassland October 1998

Forest Plan and Environmental Impact Statement

Since the completion of these documents the Estes-Poudre and Redfeather Ranger Districts have been combined into the Canyon Lakes Ranger District.

Forest Plan

Chapter One, page 28, #93, second paragraph. The parenthesis statement should be changed from "(See *Forest Plan* Appendix G,..." to "(See *FEIS*, Appendix G,..."

Chapter One, page 32, #117, 119, 120, 121, 122. Each of these should have the statement added; "Refer to the Old Growth Decision Map presented in the Draft Environmental Impact Statement for the Draft Revised Forest Plan."

Chapter One, page 34, #135. A typographic error was made. The standard referred to in Standard #135 is Standard 12.

Chapter One, page 38, #155. The Forest Plan was developed using the "Visual Management System". Standard #155 is part of the "Scenery Management System". Std #155 was included in the Forest Plan in error, and it cannot be implemented at this time because the two systems are not compatible in their terminology or application of standards. Std #155 will be put in effect after a Forest Plan amendment is completed that adopts the new "Scenery Management System."

Chapter One, page 38, #158. Change the words "scenic-condition objectives" to "visual quality objectives". These changes are needed to maintain consistency with the current Visual Management System rather than the yet-to-be-adopted Scenery Management System.

Chapter Two, Travel Management Strategy Tables (various)

On the map page which is at the beginning of each geographic area write-up, there is a listing of the management area prescriptions allocated to that geographic area. Five of the Travel Management Strategy tables (at the end of the geographic area write-up) do not agree with the allocation and have too many prescriptions. Therefore, delete all the rows on the Travel Mgmt Strategy table associated with the following management prescriptions listed below.

Buckhorn Geographic Area, page 147: delete Management Areas 1.2, 1.3 and 3.3

Crosier Geographic Area, page 163: delete Management Area 2.2

Pingree Geographic Area, page 182: delete Management Area 2.2

Poverty Geographic Area, page 191: delete Management Areas 1.2 and 3.3

Parkca Geographic Area, page 303: delete Management Area 5.11

Chapter Two, Geographic Area Direction (various)

The following specified sentences should be changed from "Limited timber harvest is <u>tentatively suitable and not available</u>." to "Limited timber harvest is <u>acceptable but not scheduled</u>."

Chicago Creek Geographic Area, p. 120, First full paragraph, first sentence

Evergreen Geographic Area, p. 123, fourth paragraph, second sentence

Yankee Hill Geographic Area, p. 138, fourth full paragraph, first sentence

Pingree Geographic Area, p. 181, last paragraph, second sentence

Poverty Geographic Area, p. 190, last paragraph, second sentence

Cameron Pass Geographic Area, p. 203, Management Area 8.21, second paragraph, last sentence

Cherokee Park Geographic Area, p. 207, last paragraph, first sentence

Deadman Geographic Area, p. 213, Management Area 3.5, second paragraph, second sentence

Greyrock Geographic Area, p. 221, fifth paragraph, first sentence

Redfeather Geographic Area, p. 243, fourth paragraph, fifth sentence

Williams Gulch Geographic Area, p. 259, fourth paragraph, fifth sentence Fraser Experimental Forest Geographic Area, p. 293, third paragraph, second sentence

Chapter Four, Table 4.2, page 395, left-most column, fourth item

Change the wording from "Air, Soil & Water-Point Source Pollution" to "Air, Soil & Water-Nonpoint Source Pollution" Supplemental Table, page 401, top line, right-most column

Fill in the blank for Aspen Regeneration to "50" at the Full level.

Environmental Impact Statement

Appendix B, Table B.1, Row referring to 100 Meters, page 13. Change "4B" to "3C".

Appendix B, Table B.2, page 15-16.

Table B.2 Habitat Effectiveness Compared with Road and Trail Densities by Geographic Area (Here format is corrected, in that this table is sorted by FS Habitat Effectiveness percentages, instead of alphabetically sorted Geographic Areas as in FEIS, Appendix B - which was a format typo. **Note**: data is <u>correct</u> in both formats, but the Mean Density and Density Range columns are not meaningful with the alphabetically sorted Table B.2 in the FEIS. Appendix B version).

Geographic Area Name	FS Habitat Effectiveness	Open Roads	Open Trails	Total Density (mi/mi ²)	Mean Density	Density Range
					By Subgroups	
Mammoth	39	2.3	0.0	2.3	3.3	
Sugarloaf	41	2.9	0.3	3.3		4.8
Elk Creek	42	3.3	1.5	4.8		to
